OBJECTIVE

Information Technology student at SIBA Campus with hands-on experience in full-stack web development, system analysis, database management, and process optimization through academic projects. Technical expertise includes PHP, Laravel, JavaScript, Python, React Native, SQL, MySQL, and data analysis tools. Demonstrated capabilities in software development, IT operations, and data-driven analysis. Project portfolio showcases proficiency in building complete web applications, managing databases, and performing data analysis

ACADEMIC HISTORY

Bachelor of Science in Information Technology
SIBA Campus, Pallakale, Kandy(Pending)

Higher National Diploma in Information Technology
SIBA Campus, Pallakale, Kandy(Completed)

G.C.E Advanced Level | Completed
St. Thomas College, Matara
Combined Mathematics - S | Physics - S | Chemistry - S

G.C.E Ordinary Level | Completed
St. Thomas College, Matara

TECHNICAL SKILLS

- Full-Stack Web Development with modern frameworks
- Database Design, Modeling & Optimization
- RESTful API Integration & Development
- Responsive Web Design & UI/UX Implementation
- Methodologies: Agile/Scrum fundamentals, debugging & troubleshooting practices

SOFT SKILLS

- Problem-Solving & Analytical Thinking
- Team Collaboration & Communication
- Leadership & Project Coordination Self
- Learning & Adaptability

PROJECTS

Smart Inventory Management System (Individual):
PHP, MySQL, Laravel, HTML/CSS, JavaScript, Bootstrap
- Web-based system to manage product inventory with stock monitoring, supplier management, and low-stock alerts.

Student Information System (Individual):
Laravel, MySQL, Blade Templating, Bootstrap
- System to manage and store student records for schools with local data entries, attendance, and result modules.

Online Sports Shop (Individual):

PHP, MySQL, Laravel, HTML/CSS, JavaScript, Bootstrap

- E-commerce platform for sports equipment with product catalog, shopping cart, and order management features.

Api Integration Projects:

RESTful APIs, JSON, Authentication

- Integrated third-party APIs in academic assignments demonstrating API consumption skills.
- Worked with authentication methods and data parsing in web applications.

AREAS OF EXPERTISE

Software Development: Full-stack web development with modern frameworks and databases.

Data Analysis: SQL query optimization, data cleaning, transformation, and reporting.

Database Management: Design, modeling, and optimization of relational databases.

Team Collaboration: Multi-language communication and cross-functional project work.

EXTRACURRICULAR ACTIVITIES

- Member of U-13 to 1st XI Cricket team at St.Thomas College
- Member of U-15 and U-13 volleyball teams at St. Thomas College
